

## 12 Days of ChrisMATH — Day 10

For this puzzle (SUM 100) you have to add some digits before or after the digits in the grid so that each row and column sums to 100. Below is an example of a solved puzzle:

8	8	4	18	8	74
6	2	5	69	26	5
3	6	1	13	66	21

For this challenge, solve the three SUM 100 puzzles on the next pages. Each puzzle below has a unique solution. To submit your answer, add all the numbers added to the grid.

In our example, the answer to submit would be 32 ( $1 + 7 + 9 + 6 + 1 + 6 + 2$ )

Puzzle 1:

8	7	8
3	1	2
2	7	2

Puzzle 2:

4	6	5
8	2	5
7	1	8

Puzzle 3:

2	8	2
1	4	7
9	5	6
